

Nicholas Humphrey Morris MB BS MEWI FRCOG

Consultant Obstetrician and Gynaecologist

Date of birth: 3.10.59

Marital status: Married to Veronica, with one son & daughter.

Home Address: 15 Dollis Park N3 1 HJ. 02083431791.

Secretary: Mrs Rowena Ashley-Fraser , 15 Dollis Park N3 1HJ.

Tel: 02083711510.

Email: rapidaccess@hotmail.co.uk

Personal Email: nicholashmorris@hotmail.com

Business Email : rapidaccess@hotmail.co.uk

Education:

🏛️ University College School 1973-1978

🏛️ St Mary's Hospital Medical School 1979-1984

Undergraduate positions

🏛️ President St Mary's Hospital Medical School Students Union.
1981-1982.

🏛️ Council Member of University of London Union.1982

Qualifications: MB BS 1984
MRCOG 1991
MEWI 2007
FRCOG 2007

Prizes:

- 🏆 University Laurel 1984.
- 🏆 Wellbeing Training Fellow RCOG 1993-1995
- 🏆 Royal Society of Medicine Obstetrics Poster Prize 1995.
- 🏆 Overseas Doctors Association: Prize for Mentoring 2004

My current Private and Medico- Legal Practice:**a). Clinical:**

I have worked in private practice in London over the last 20 years. I have developed a team approach to private practice and have formed a consortium, 'rapid access gynaecology' to provide the best imaging and diagnostic care. I work with Gordon Cochrane and Dean Meredith, who was an NHS colleague of mine, and we established an ultrasound service in North London. I run 3 clinics a week and one operating list. I often operate with a colorectal surgeon when performing complex endometriosis.

I currently consult at the Portland Hospital and the Wellington Hospital, and at 21 Weymouth St. I am recognised by all the major Insurance Companies

In the last 12 years, I have, in addition to my gynaecology practice, developed a cosmetic gynaecology practice and carry out labial surgery and reconstructive perineal and pelvic floor surgery. I am the Consultant Gynaecologist at the Hospital Group.

The Genital Surgical work stemmed from my NHS practice in North London, where I established the first clinic in the world to support women who had been victims of female genital mutilation. This clinic was established in 1997 and, as a result of the support from the late Baroness Rendell, I was an advisor to the revised FGM act of 2003. At the same time I saw an increasing number of women who were affected by the anatomy of their labia and by the physical and emotional affects.

I practice general gynaecology, and am an experienced surgeon. I carry out both open and laparoscopic and endoscopic procedures.

I outline the types of surgery I carry out:

- Minimal access surgery: operative laparoscopies, ovarian cystectomies, oophorectomies and hysteroscopy, and treatment of severe endometriosis.
- Major gynaecological surgery: complex hysterectomy, myomectomies.
- Vaginal surgery: pelvic floor repair (primary and secondary). Vaginal hysterectomy.
- Vaginal and vulval refashioning.
- Obturator and tension free tapes.
- Endometrial ablation mainly with Novasure technology.
- Versascope technology and endometrial resection.
- Truclear and myosure procedures for fibroid surgery.

My breadth of experience is based on the fact that I spent 9 years as an NHS consultant with a very busy and exciting practice.

In 2014-2015, I returned to the NHS to run a fertility clinic and the Queen Elizabeth Hospital in Margate. This provided me with further NHS surgical exposure.

I have recently been appointed as Advisor to a new health care company, One Health, in Hammersmith to develop post reproductive healthcare services. This service will start in Autumn 2017.

App development : see later in CV. I am working with the Tommy's campaign to develop this.

b). Medico-Legal Work:

I established my legal practice in 2006, and in 2007 I attended the Bond Solon, and Expert Witness training courses. I then became a member of the AVMA panel and a member of the Institute of Expert witnesses. I regularly attend the AVMA, premex training days and teach on several medico legal seminars. I am currently involved in the Obstetric and Birth Injury study day at 7 Bedford Row Chambers, and previously, I taught on the Middle Temple Advocacy course.

My work is varied both in the Civil and Criminal Court. I am an expert for several Coroners Courts, and also the General Medical Council. I have also given evidence in the Crown Court and in the Court of Protection.

I normally see 2 medico legal patients a week for condition and prognosis reports. I write between 80-100 reports a year, and am now a mentor to new experts.

Research Grants awarded:

- **Grants:** North West Thames Regional Health Authority Regional Research Grant 1989. **£18,000.**
- WellBeing/Birthright Training Fellowship. Endothelial dysfunction and preeclampsia 1993 –1995. **£70,000.**
- Organon Research Grant 1994. **£4,000.**
- Organon Research Grant 1996. **£2,000.**
- British Heart Foundation Project Grant 1996. The Genetics of Preeclampsia. **£ 100,000.**
- Supplementary BHF grant 1997. **£15,000.**
- Sandoz Research Grant, jointly with Dr Dekker, Holland. **£ 15,000**
- Department of Health Community Health Grant. The Wellwoman African Clinic 1990. **£85,000**

- R and D grant 2003 (North West London Hospitals NHS Trust) for placental angiogenesis. **£12,000.**

Career Grant Funding **£344,000**

Previous NHS positions:

Consultant Obstetrician & Gynaecologist (1996-2005), Central Middlesex Hospital and Senior Clinical Research Fellow, Academic Dept of Obstetrics & Gynaecology, Imperial College School of Medicine at the Chelsea & Westminster Hospital 1996-1999.

Current Position:

Consultant Gynaecologist the Wellington Hospital and Portland Hospitals, and the Hospital Group. Medical Advisor to One Health Hammersmith. Clinical Lead at Caretek Medical.

PREVIOUS APPOINTMENTS:

| | |
|-----------------|---|
| Aug 84 - Feb 85 | House Surgeon to Mr D. Britton Royal United Hospital, Bath |
| Feb 85 - Aug 85 | House Physician to Dr E.Keal St Mary's Hospital, London. |
| Aug 85 - Feb 86 | Senior House Officer to Mr David Liu (Obstetrics) Nottingham City Hospital |
| Feb 86 - Aug 86 | Senior House Officer to Miss James, Mr Kenney, and Mr Cameron (Gynaecology). St Thomas' Hospital. London. |
| Aug 86 - Feb 87 | Senior House Officer to Mr R. Touquet (Accident and Emergency) St Mary's Hospital, London. |
| Feb 87 - Aug 87 | Senior House Officer to Mr D. Rosin (Surgery) St Charles' Hospital, London. |

- Aug 87 - Aug 88 **Senior House Officer Rotation** to Prof Beard, Prof Steer, Mr Loeffler, Mr Paintin and Mr Fraser. **Samaritan Hospital, London.**
- Aug 88 - Feb 89 Senior House Officer to Mr Fisher, **(Obstetrics) Northwick Park Hospital, Harrow Middlesex.**
- March 89- Sept 89 Research Assistant, Dept of Biochemistry, **St Mary's Hospital Medical School.** To Professor Robert Williamson.
- Nov 89 - Nov 91 **Registrar Rotation Royal Free Hospital, Edgware General Hospital, London.** Mr Walker, Mr Magos, Prof Shaw, and Mr Condie, Mr Bernhardt and Mr Simanowitz.

POST-MEMBERSHIP POSITIONS:

- Dec 91 - Oct 92 Registrar to Prof Chamberlain, Mr Stanton, Mrs Varma, and Mr Pearce. **St George's Hospital, London.**
- Nov 92 - May 93 Locum Senior Registrars to Mr Ellis and Mr Charnock, **The John Radcliffe Hospital, Oxford.**
- May 93 - May 95 WellBeing Training Fellows **and Hon Senior Registrar**, Academic Dept of Obstetrics and Gynaecology, (Supervisor, Prof P.J. Steer), Charing Cross and Westminster Medical School, London.

Senior Registrar

- May 95- December 96 **Clinical Lecturer and Senior Registrar**, University of Cambridge, Department of Obstetrics & Gynaecology, Rosie Maternity

Hospital and Senior Registrar at Ipswich
Hospital NHS Trust.

**Consultant Position at Central Middlesex Hospital and Senior
Clinical Research Fellow to Imperial College at the Chelsea and
Westminster Hospital 1996-2005:**

NHLNHS Trust is one of the busiest Hospitals in London. It currently has 5,200 deliveries, but since there is an extremely poor and ethnically diverse population it is regarded as very 'high risk'.

When I first arrived at CMH, I was surprised at the number of refugees from North Africa, who had undergone genital mutilation, and that there was no specific service available for them in maternity.

I was also shocked that there was not appropriate parent craft education and postnatal support for a very vulnerable group of patients. There was however an active Maternity Liaison Services Committee which was successful in driving the Trust to recognise the needs of some pregnant women.

Sadly it was often the case, that politically, a group of transient refugees or immigrants were not the Trust's priority. This is not unique to North London, but is now a National problem. I chose to work with my patients, GP's and their communities in order to improve maternity care. Initially, I was able to make significant improvements to the clinical services. The then Trust's Chairman and Baroness Ruth Rendall supported me.

I then became increasingly worried about the Trust's lack of support and insight for the Maternity Unit, and was particularly concerned that a merger with Northwick Park Hospital would result in a clinical disaster. This was based on my real concerns that there was both a lack of physical and clinical resource; the labour ward and wards did not have the capacity to accommodate more pregnant women and a deep loss of staff morale. This was also the concern of the Maternity Services Liaison Committee.

I raised my fears in 2002 at an extraordinary meeting of the Medical Staff Committee at the hospital. All my colleagues supported me, but the Trust failed to listen. In 2004, I reported these issues to senior management and the Trust and finally to the Health Care Commission having attempted to deal with these issues in-house for 3 years. They

were inspecting the hospital after there had been 9 maternal deaths in a very short period of time.

At this stage, the HCC were working for the Trust and even though many of us raised issues surrounding safety and the danger of the unit, the HCC did not introduce special measures, which was my request.

Early in 2005, I went to the HCC to again raise my concerns. Special measures were eventually introduced in April 2005, following a further maternal death, however, there was no change in the clinical leadership of the Department. It was for this reason I resigned to develop in private practice.

Well Woman African Clinic for victims of female genital mutilation:

I have outlined the work in this clinic in a previous section.

I developed a business plan for a dedicated midwife and interpreter and I recruited Mr Harry Gordon to work with us in the clinic. This clinic has now become established and sees up to 20 patients in each clinic, and we have carried out over 300 reversals of circumcision. The work in this clinic was highly regarded by the local PCT, the Department of Health and the Health Care Commission.

The funding was achieved with the support of Mr Mark Brignall, who was the Head of Commissioning at the Department of Health. During the life of the clinic, I also engaged the services of a Midwife Lecturer and a Psychotherapist to work on the very real needs of the patients.

Mr Gordon and I have published our clinical experiences in several journals. I have also spoken at National and International meetings about the work.

Department of Health Community Ethnic Health grant:

In 1999, we were awarded a Department of Health grant to fund the very important work of this clinic, and we have acted as Advisors to the WHO on female mutilation. The clinic's work is diverse ranging from reversing circumcision for young women before marriage to sorting out the complex medical issues of refugees with multiple pathologies.

The success of the clinic was because there are excellent link workers, who are respected in the Somali community, and that the clinic has been run by 2 consultants and a senior midwife. We have offered a family planning service and also a counselling service.

2003: Genital Mutilation Act:

In 2002, Harry Gordon and I were invited by Baroness Rendall to advise her on the House of Lords bill which was passed in 2003. In 2008, I wrote an article about this work in the Clinical Risk journal.

Labour Ward :

I also had 2 maternity unit sessions at the hospital, where I taught the junior doctors and midwives practical aspects of labour ward management and maternal medicine. I also organised debriefing sessions following a stillbirth or untoward clinical accident. I was also responsible for the inpatient antenatal care. I held a weekly maternal medicine teaching session.

The antenatal service at Central Middlesex:

I was the lead clinician for antenatal services at Central Middlesex and with the help of the Senior Midwife and the Superintendent Ultrasonographer set up a 'flexible' antenatal service. An excellent diabetic, cardiac and haematology team supported us. We set up screening for thrombophilia and offered a joint service with the haematology department.

We also developed the use of key link workers within each ethnic community. In 1999, I set up a link for fetal medicine support from University College Hospital. I funded 2 Oxford 8000 CTG machines, which are in routine use in the antenatal clinic. I was also responsible for the antenatal care of the chronic hypertensive, previous severe pre-eclampsia and for women with sickle cell disease, and chronic lung disease and thrombophilia.

Amniocentesis service:

I established a formal amniocentesis service at CMH. Before my appointment, registrars carried out the amniocentesis procedures and

the miscarriage rate was over 20%. This has now dropped to 1%. At the same time I worked closely with the gynaecology nurse practitioners to develop a medical midtrimester termination service, and a counselling service. I ran the joint monthly ultrasound anomaly meetings at Central Middlesex.

I have developed a good relationship with the Tommy's Campaign Academic Unit at St Thomas' Hospital, and have collaborated closely with Professor's Poston and Shennon on several of their major projects, (Premet and VIP).

I was an active member of the Maternity Services Liaison Committee and advised the Trust on Clinical Guidelines.

Gynaecology:

Surgery:

I very much enjoyed the gynaecological aspects of my post. I held a weekly operating post, and carried out both major abdominal and vaginal surgery. I have level 2 certification for laparoscopic surgery. I carry out laparoscopic cystectomies, adhesiolysis and oophorectomies. I have been trained in the use of the TVT and Hydrothermal ablation, Thermachoice, and Novasure for menorrhagia.

Gynaecological clinics and psychosexual/ therapy support:

I funded a counsellor and psychosexual therapist to work alongside me in the gynaecological clinic. Indeed I was able to release a registrar from the clinic, because it soon became clear that this service provided many benefits for the patients, and they were not just sent off for a further blood test to be recalled in a few months. The therapist and I often saw patients together, and she often provided support for patients before and after surgery. The counsellor Ms Collings was also registered for a PhD under the joint supervision of myself and Professor Christine Norton of St Marks Hospital. She has presented our work at both National and International Meetings.

I was also responsible for the gynaecological management of patients with sickle cell disease and thrombophilia. I was the first consultant in the Trust to use Metformin and Dexamethasone to treat polycystic ovarian disease.

TEACHING AND ACADEMIC:

Since I qualified, I have always been involved in teaching. I enjoy both teaching and organising topics for discussion. I am actively involved in teaching the medical students, SHOs and the midwives. While I worked in Cambridge, I was responsible for the undergraduate teaching programme, and the final MB exams. I supervised the MB PhD students at Trinity and Downing College, and organised the Rosie Bourn Hall Reproductive Medicine seminars in Cambridge.

Between 1991-1998, I ran a successful MRCOG course, which was based at the Cromwell Hospital I and was then based at Central Middlesex Hospital. I have taught on the Dartford Hospital and Northwick Park Hospitals DRCOG courses.

I have been an external examiner in Obstetrics and Gynaecology at University College and Imperial College.

In 2004, I was awarded the Overseas Doctors Association Mentoring prize for the work I have carried out supporting overseas trainees in starting a career in the NHS.

I ran the postgraduate meetings at the Portland Hospital. I am a trained appraiser both in the NHS and private sector, and was part of the FIPO working party into consultant appraisal. I am now on the management group of Caretek Medical.

Medical Advisor to Mount Carmel Medical-Southern Ireland 2006-7:

Over this 2-year period, I worked as Medical Advisor to Harlequin Healthcare and now Mount Carmel Medical, recruiting managers and senior consultant staff and writing governance guidelines. I was responsible for restructuring Aut Even Hospital in Kilkenny, and working with the CEO of the Company, Mr Joe Kelly.

ADMINISTRATION:

I was President of the doctor's mess at Edgware Hospital, and worked closely with the Medical Manpower Committee. I re-organised the representation of the junior staff to the management, and negotiated

the refurbishment of the doctor's mess. During my WellBeing Fellowship, I set up and co-ordinated the London Pre-eclampsia study group.

I was a co-founder with James J. Walker & Gus Dekker of the European Reproductive Vascular Workshop. We have had 5 highly successful meetings in Leeds and in Amsterdam, and I have organised the third meeting, which was held in Park Royal in June 1997. I am now on the committee of the London Pre-eclampsia and Placental Group.

Hospital and National Committees:

I was a member of the R & D committee, the Drugs and Therapeutics Committee and the Transfusion Committee of the hospital. I chaired the guidelines committee for the Maternity Unit.

I have given several grand round lectures at the hospital. I am a reviewer for the Journal of Obstetrics and Gynaecology, British Journal of Obstetrics and Gynaecology and the American Journal of Obstetrics and Gynaecology.

I have served on the editorial board of Reproductive Vascular Medicine. I have been a reviewer for the Tommy's campaign. I was an active at the CMH Medical Staff Committee. I was the London West Representative for the Hospital Consultants Specialist Association.

I chair the Portland Hospital's CME committee and run the education programme.

I am currently an active member of the London Consultants' Association and an appraiser for the Hospital group.

Fundraising:

Well-being Training Fellowship 1993-1995:

I was awarded the Wellbeing Training Fellowship by the Royal College of Obstetricians and Gynaecologists in May 1993. The aim of the project was to investigate endothelial cell function in pre-eclamptic and normotensive pregnancy. I received a commendation from the WellBeing Scientific Committee for my work. I developed clinical

training in Doppler ultrasound. I also developed a wide range of laboratory-based skills. I was taught both umbilical and placental lobule in vitro perfusion. I learnt radioimmunoassay techniques for cyclic GMP and prostacyclin, and tissue culture techniques. I used chemiluminescence to measure nitrite and nitrate. I also set up an assay for nitric oxide synthase in placental tissues. I set up a placental RNA library, and performed reverse transcriptase polymerase chain reaction (RT-PCR), DNA gel purification and sequencing. I also developed skills in immunohistochemical localisation of nitric oxide synthase in placental tissues. I used high performance liquid chromatography to measure the placental aminogram.

I have presented my work both at national and at international meetings. I was a Plenary Speaker at the Tox Talks in San Francisco in 1995 and at the International Society of the Study of Hypertension in Pregnancy in Seattle in 1996. More recently I have lectured on the genetics and the medical disorders associated with pre-eclampsia.

British Heart foundation:

Genetics of pre-eclampsia 1997- 2001:

In 2002, I finished a **British Heart Foundation grant** with Kevin O'Shaughnessy, who is a Clinical Pharmacologist in Cambridge. We had been funded to collect sibling pairs, affected with pre-eclampsia and to carry out a series of candidate gene studies. We have collected 85 sibling pairs, and have carried out a series of candidate gene studies. We currently have the largest series of affected sibling pairs in the world.

We have submitted abstracts on our current work to the SGI and to the British Fetal Maternal Medicine Society meeting, and our papers have been published in international journals.

We have been fortunate to have a supplementary grant from the BHF to allow our technician to study for a PhD. We employed a full-time midwife, who has been very successful in recruiting the sibling pairs. We have carried out a major study on NOS111, MTHFR and Factor V Leiden Point Mutation, GP111a and prothrombin we have also

established that there is concordancy in twins for pre-eclampsia. We have published 4 major papers in high impact journals.

African Well woman service 1998 onwards:

In June 1998, Mr Harry Gordon and I were awarded a Department of Health grant to develop an R and D research programme to assess the role of a clinic for women from Northern Africa who have been victims of genital mutilation. This grant has initially been awarded for 3 years. Our aim is to encourage reversal of female circumcision either prior to pregnancy or early in the second trimester. Mr Gordon, who coordinates the project, is the WHO advisor on female circumcision. The clinic has become popular with the local population, and we have now demonstrated that reversal is ethnically acceptable. We have also shown that 80% of women have an intact clitoris. Our current work is to assess how to reduce clitoral scarring. We set up a family planning clinic and a psychosexual clinic for the Somalian population. These projects have now been completed. We employed Sarah Collings as our psychologist. We have presented our work at the British Society of Psychosomatic Obstetrics and Gynaecology, British Fetal Maternal Medicine conference, European Contraception conference and at the World Sexology conference.

Tommy's campaign 2000 -2002:

I have been a collaborator with the Tommy's campaign current project, **Premet**. Prof Poston, the Director of Research at the Tommy's campaign, has provided a midwife to recruit patients at risk of preterm labour from my antenatal clinic.

Funding from Local R and D committee:

PhD Supervision of Dr Michael Egbor:

The use of stereology in assessing the placental anatomy obtained from normal pregnancy, and those complicated by pre-eclampsia and fetal growth restriction 2002 -onwards **Placental angiogenesis:**

This was a joint study of the placental anatomy using the mathematical model of stereology to assess the terminal villi in these

placentas. It was Drs Ansari and Sibbons from the Northwick Park Institute for Clinical Research who were my co-workers. Our research fellow was Michael Egbor, who I originally funded from a previous grant, and who now is funded by the Clementine Churchill Hospital.

The study was completed in 2006, and Michael has demonstrated that there are major changes in the shape, branching and surface areas of the terminal villi in these pregnancies.

He has presented our work at the European Placental Group, the Royal Society of Medicine and in April 2004 at the Maternal Fetal Medicine conference in Glasgow. He has now been awarded his PhD, and 2 of the papers have been accepted for publication.

39. An update on birth injury Forum 7 Bedford Row. June 2017.

MEDICAL SOCIETIES

- International Society for the Study of Hypertension in Pregnancy.
- Blair Bell Research Society.
- East Anglia Obstetrics & Gynaecology Society.
- Founder Member European Vascular Workshop.
- British Society of Psychosomatic Obstetrics and Gynaecology.
- Medical Society of London.
- Chelsea Clinical Society.
- Founder member of the London Pre-eclampsia and Placental group.
- The Royal Society of Medicine.
- Independent Doctors Forum
- London Consultants Association
- Member AVMA panel.
- Member of the Institute of Experts Witnesses.

Career plans:

I am a specialist gynaecologist with a particular interest in pelvic pain and vaginal reconstruction, and psychosomatic aspects of gynaecology.

I believe my CV demonstrates that I am a very experienced clinician and a good communicator, with an interest in both medicine and medico-legal law.

I am part of an App team alongside Prof Philip Steer, and Sir Sarum Arulkumaran and Prof Lucilla Poston developing a fully comprehensive pregnancy app for mothers to be better supported in pregnancy. I developed the idea for this app, and recruited my clinical colleagues. We have completed the proof of conduct stage.

Hobbies: I am married to a dentist, and we have 2 teenage children. I am a tennis fanatic and a very poor sailor. I enjoy the theatre and music. I play the violin. I established a co-existence Tennis charity in

the UK 2 years ago (The UK Friends of Freddie Krivine), and am currently the UK chair.

Referees:

1. Mr John Spencer FRCOG Consultant Gynaecologist, Marie Stopes International.

Mobile 07711670712. jadspencer@msn.com (Clinical and previous appraiser)

2. Mr Romi Navararatnam FRCS , Consultant General Surgeon, The Hospital of St John and St Elizabeth. 07957543130.

romi.navaratnam@gmail.com (Surgical colleague)
